Data and Privacy File Guides

iCloud: Apple Features Using iCloud: FaceTime Recents

September 2019

File name

Recents

File description

This file contains information about the user's recent interactions with other people.

Why Apple keeps this information

Apple retains this information in order to limit the number of stored interactions, distinguish between old and new records, and improve email and phone number suggestions.

Field Name	Details
Map Location	The maximum number of recent entries stored in the database
Encoding Version	The software version with which the record was created
